

FOR IMMEDIATE RELEASE

**WESTON SOFTWARE, INC. RELEASES NEW VERSION
OF ITS POWER TOOL ADMINISTRATOR™**

Southport, CT — July 22, 2009 — Weston Software, Inc. today announced it will launch a new version of its enterprise software application, **Power Tool Administrator™**, which works with Microsoft Windows® 7 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. Power Tool Administrator is a heterogeneous identity and access management solution developed specifically to address the challenges associated with managing identity, security and compliance auditing within virtual and cloud computing environments. It enables non-Microsoft systems to be securely managed from a Windows Desktop in a non-intrusive, agent-less fashion while providing cross-platform audit and control that enables better compliance with SOX, PCI, HIPAA and other regulatory requirements. Power Tool Administrator supports all popular UNIX and Linux operating systems while leveraging their existing authentication infrastructures.

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“Weston Software is excited to launch this new version of Power Tool Administrator,” said Hank Voight, President and CEO at Weston Software, Inc. “Making our application compatible with Microsoft Windows 7 helps us offer our customers compelling benefits, including intuitive user interfaces such as multi-touch, improved security and reliability features, full support for multi-core processing, sophisticated management features, and flexible access administration in cloud computing and virtualized environments.”

Weston Software, Inc. is a member of the Microsoft BizSpark™ startup initiative and the Interop Vendor Alliance. Weston Software, Inc. is a leading provider of Microsoft Windows based management solutions for UNIX, Linux, and Mac platforms. Power Tool Administrator and the patent-pending Power Tool Framework™ helps organizations improve efficiency, better comply with regulatory requirements and move toward a more secure infrastructure for their heterogeneous computing environment in an agent-less fashion.

About Weston Software, Inc.

Weston Software, Inc. is headquartered in Southport, Connecticut, and maintains a sales office in San Jose, California. The company has more experience than any company in the UNIX/Linux/Mac and Microsoft Active Directory and Windows integration market. Weston Software, Inc. was founded by Hank Voight, a 10 year architect at Microsoft where he was one of the original six “UNIX Men”. From 2002 to 2005, Mr. Voight concentrated his efforts in integration of UNIX/Linux with Microsoft Windows, and his efforts led to the first Kerberos and LDAP integration guide as well as the current distribution of MIT’s Kerberos.
